Core Competencies

- Federal Digital Transformation: End-to-end, USWDS-compliant Drupal architecture, decoupled headless CMS development, and custom software engineering.
- Accessibility & Compliance Automation: Deployment of the Comply+ engine to handle automated digital remediation, Section 508, and WCAG 2.1/2.2 AA compliance auditing.
- Secure Systems Engineering: Lifecycle software development and DevSecOps practices rigorously aligned to NIST SP 800-171 and NIST SP 800-53 standards.
- Infrastructure & Logistics: TAA-compliant hardware procurement, physical access control/surveillance deployment, commercial solar installations, and specialized environmental engineering services.

Differentiators

1. Predictable Lifecycle Costs: Maintenance, routine compliance testing, and platform patches are incorporated directly into our delivery agreements, protecting agency budgets from unexpected operational cost overruns.
2. The Comply+ Edge: Our proprietary compliance software allows us to rapidly identify and remediate legacy accessibility gaps (like high-volume PDF and platform errors) faster than traditional manual developer workflows.
3. Comprehensive Operational Footprint: We bridge the physical-digital divide by handling an agency's software engineering, background helpdesk, infrastructure supply chain, and physical facility security under a single, unified corporate umbrella.

CORPORATE OVERVIEW

Codes and Cogs is an agile technology solutions provider specializing in secure digital infrastructure for federal, state, and academic institutions. We engineer USWDS-compliant Drupal frameworks, deploy advanced physical security infrastructures, and provide specialized operational support. Driven by our Comply+ Accessibility Remediation Platform, we accelerate time-to-compliance, modernize legacy digital environments, and safeguard mission-critical agency operations.

COMPANY CODES & CLASSIFICATIONS

- Primary NAICS: 541511 – Custom Computer Programming Services
- Secondary NAICS: 541512, 541513, 541519, 513210, 334118, 213112, 562910, 541360, 561421, 561422, 561110
- Product Service Codes (PSC): R605 (Call Center/Customer Service), F999 (Environmental Services), F108 (Remediation), B502 (Air Quality Studies), 6117 (Solar Electric)

Services Provided

Software & Digital Solutions

- Enterprise Drupal Development & Modernization (USWDS-Compliant)
- Custom Mobile & Web Application Engineering
- Comply+ Automated Accessibility Remediation Engine
- Continuous Section 508 & WCAG 2.1/2.2 AA Monitoring

Business Process & Operations (BPO)

- Omnichannel Contact Center, Helpdesk, & Telephone Answering Services
- Secure Data Entry, Information Verification, & Workflow Automation
- Independent Accessibility & Cyber Security Assessments

Infrastructure & Tactical Logistics

- Physical Facility Security & Access Control Systems Installation
- TAA-Compliant IT Hardware Procurement & Supply Chain Management
- Commercial Solar Installation (EPC) & Modular Energy Solutions
- Oil & Gas Operations Support, Well-Site Remediation, & Methane Detection Infrastructure
